2. Guide to these operating instructions

These operating instructions must be read, understood and observed in all points by all persons who are responsible for the booth. Only with knowledge of these operating instructions can errors be avoided and safe and trouble-free operation be guaranteed. SCHNIER Elektrostatik GmbH accepts no liability for damage resulting from nonobservance of these operating instructions!

3. Intended use

This device is intended exclusively for use as a hand cable for flocking.

ATTENTION

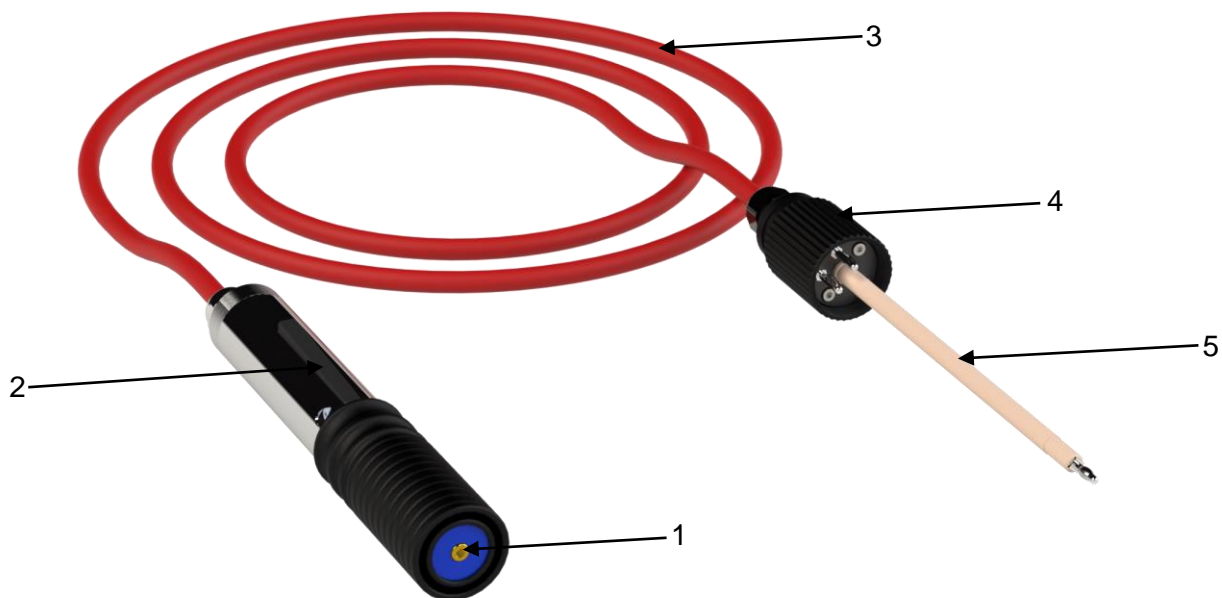

Any commissioning outside this provision is prohibited.

Damages / Modifications:

No structural modifications of any kind may be made to this device.

4. Structure and overview

- 1 Contact for applicator
- 2 Push button
- 3 High voltage cable
- 4 Union nut
- 5 High voltage connector
- 6 Applicator
- 7 Screen

5. Functional description

5.1. Commissioning

- Insert the high voltage connector [5] of the hand cable into the high-voltage connection of your device (Fig. 1).
- Please tighten the union nut [4] only slightly.
- Place the applicator [6] on the handle and tighten it only "hand-tight".
- Fill the flock into the applicator and place the suitable sieve [7].
- As soon as the button [2] is pressed, the high voltage switches on.

	The HV connector must always be clean and dry. Moisture and impurities will damage the devices.
